米now Us

A successful business legacy using innovative materials in the foodservice and packaging industry, that this simple word was just right, no matter how you read it Our products, our company, and our spirit all revolve around the idea that life is a circle, after all We know that anything we make has a good beginning-of-life story and a good end-of-life story.

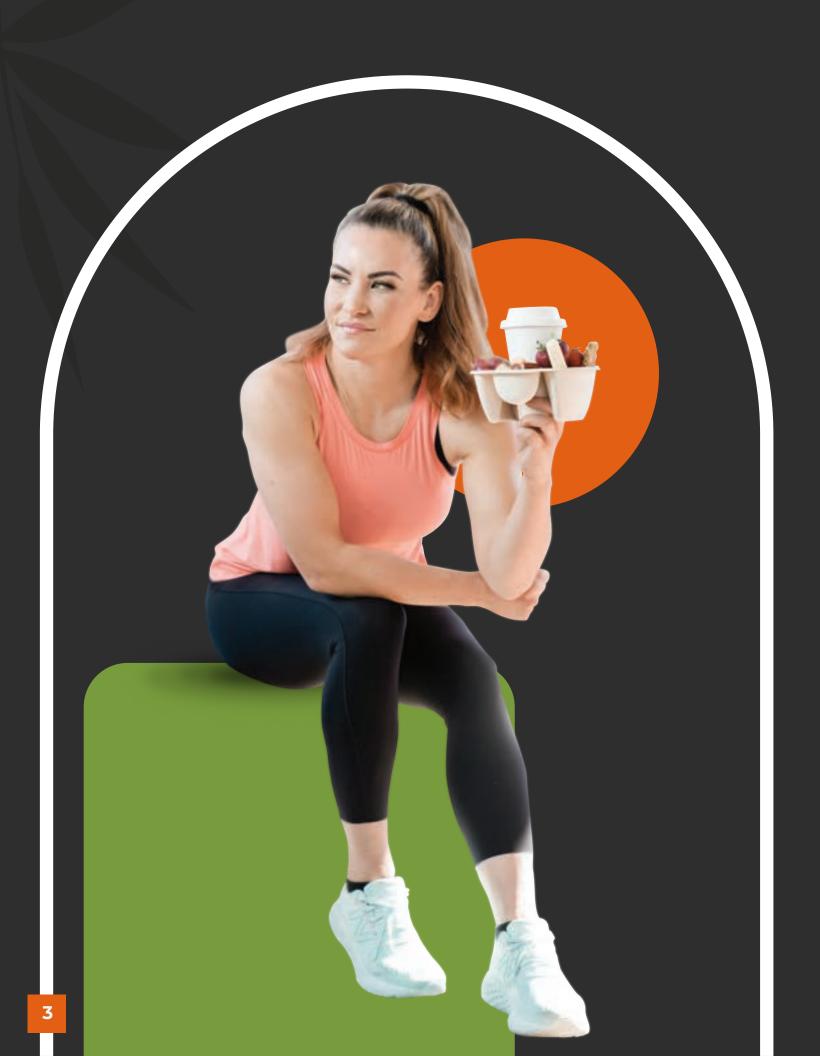

The Meaning of Kanak: The word Kanak is a palindrome; it's the same forwards and backwards. It goes full circle. The word itself means many things. It can mean "gold" in Sanskrit. It's also a type of wheat grain - a source of nutrition and life around the world. We see our founding family's initials within the letters of Kanak.

We knew that when we decided to bring our successful business legacy using innovative materials to the food service and packaging industry, that this simple word was just right, no matter how you read it.

Our products, our company, and our spirit all revolve around the idea that life is a circle, after all. We know that anything we make has a good beginning-of-life story and a good end-of-life story.

We see life, health, strength, life and our own unique heritage in this short, simple word. It just made sense to choose Kanak Naturals as our name - and our philosophy. We hope you find your own meaning in Kanak, because we all know that the path to a better, more responsible life starts from within. The best part is yet to come".

We are, **Kourageous** and **Kurious**.

***Kore Mission: *Kontrolling *Kost**

Kanak Naturals is a Family Owned, Privately held and Debt Free company. Sustainability and the Environment is not a **Kuarterly** Issue for us, it is a **Kuarter** Century Issue that we can all address together.

With the environmental pledges made by countries and corporations added together, we would need 3.95 Billion Acres or 1.6 Billion Hectares of land to plant trees. USA has 2.43 Billion Acres, so an area about 1.5 times the size of our country. Seriously?

This is clearly a near-impossible task, and we believe lessening levels of consumption through innovative business ideas may be more effective.

Since trees are vital to our ecosystem, and they shouldn't be made into single-use products. Renewable materials like Bamboo & Sugarcane are some of the strongest fibers out there. They make great dinnerware that hold up to just about anything you could throw at them. Best of all, these materials grow rapidly and are about as far from plastic and foam as you can get. Perfect!

That is how we started. We upscale sugarcane, source rapidly renewable bamboo and use nothing but plants to make our products. Our state-of-the art manufacturing facility efficiently and intelligently crafts our fiber products into works of art.

The only impossible journey is the one you never begin

- Tony Robbins

%anak's %reation:

The three major sources of cellulose based fibers used in the world to manufacture Paper are hardwood and softwood pulp, cotton fiber along with Bamboo and Sugarcane fiber (often called bagasse). We use Bamboo and Bagasse for our dinnerware. Why?

Bamboo is a fast growing renewable resource and can be re-harvested every 4 to $4\frac{1}{2}$ years. In comparison hardwood trees have a 30 to 60 year growth cycle. Bamboo grass does not require re-planting unlike hardwood-softwood Sugarcane is renewable because it's a crop that is replanted over every year. After the cane-juice is extracted from the Sugarcane Stalk, we upcycle the stalk (bagasse) which otherwise would end up in landfills or burnt to produce beautiful molded dinnerware.

Change your plate.
Change your fate.

Kris Carr. American Author,
 Wellness Expert

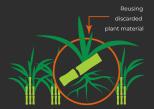

PLANT BASED MEAT

DINNERWARE

RENEWABLE MATERIALS

After sugarcane juice is extracted from the plant, we upcycle the stalk, which would have been burned or ended up in a landfill, into beautiful molded fiber dinnerware. Renewable materials like sugarcane and bamboo are some of the strongest fibers out there.

They make great molded fiber products that hold up to just about anything. Best of all, these materials create less waste than paper (wood pulp), and no chlorine is used in manufacturing.

Because they grow so rapidly, they are easily replenished each year and are about as far from plastic and foam as you can get. this was a simple step toward sustainability and ensuring our products are Tree-Free.

MANUFACTURING

We know that sustainability in not just about plants and smarter products, it's about people, jobs and energy. Out communities and facilities are part of our sustainability story. We have a state-of-the-art manufacturing facility that intelligently crafts our fiber products into works of art. Not only that, we audit our manufacturers to the best social compliance standards going. The people that build our products work in safe, healthy spaces.

Best of all, we are bringing our molded ber manufacturing technology to the US, so we can do what we do best, right here at home.

WASTE DIVERSION

Because we use only renewable materials, all our products are BPI Certified to be commercially compostable. That means that when you are done using one of our plates or bowls, you can compost it in a commercial compost facility. Even if you can't compost in your area, our products help shift everyone farther away from plastic and foam. By creating products that have great beginnings, middles, and endings, we're leading the way forward. That is how we think about sustainability

OUR FUTURE

All our products are made well, and made smart. We know that choosing products that are be er for the environment should be something that everyone can do. It should be easy, not more expensive.

Sustainability at Kanak Naturals means bringing smarter products to everyone at the right price. That way, anyone can be the change they want to see in the world.

Our Kustomers

Our customer audience is anyone who buys, sells or uses single use dinnerware. But also thinks twice about it.

Kanak Naturals is serving the Retail Chains, Restaurant Chains, Food Processors and Foodservice Industry nationally and across North America. We have some of the largest dinnerware programs for customers Nationally.

Kids today should grow up thinking the stupidest thing in the whole world is to throw something away.

- Peter Senge, MIT Business Professor, Author of The Fifth Discipline

We get what we tolerate

We believe together we can make an impact.

Plastic Bags

You see the difference, but not all animals do! Plastic bags can be confused with jellyfish by sea turtles and many larger predatory fishes.

Run for profit and waste have been the primary drivers for climate change. We can no longer exploit earth's treasures cheaply.

Doing a little something is better than doing a lot of nothing. We acknowledge the collective ownership between humans, naturals resources and animals in this small planet of ours.

The COVID-19 pandemic has caused and will continue to cause immense suffering. If there is hope that can came out of it, then that may arise from the whole world having experienced a shared threat and found a sense that we are all in it together.

- David Attenborough

Susfainables®

We never underestimate America's attraction to gastronomic pain. This is why we rigorously test our Dinnerware against all types of food palates.

Oily, Acidic, Habanero Peppers, Szechuan Chilli Flakes, Fried Garlic, Black Bean Sauces.

So the dinnerware in your hands will perform exceptionally well no matter what you eat.

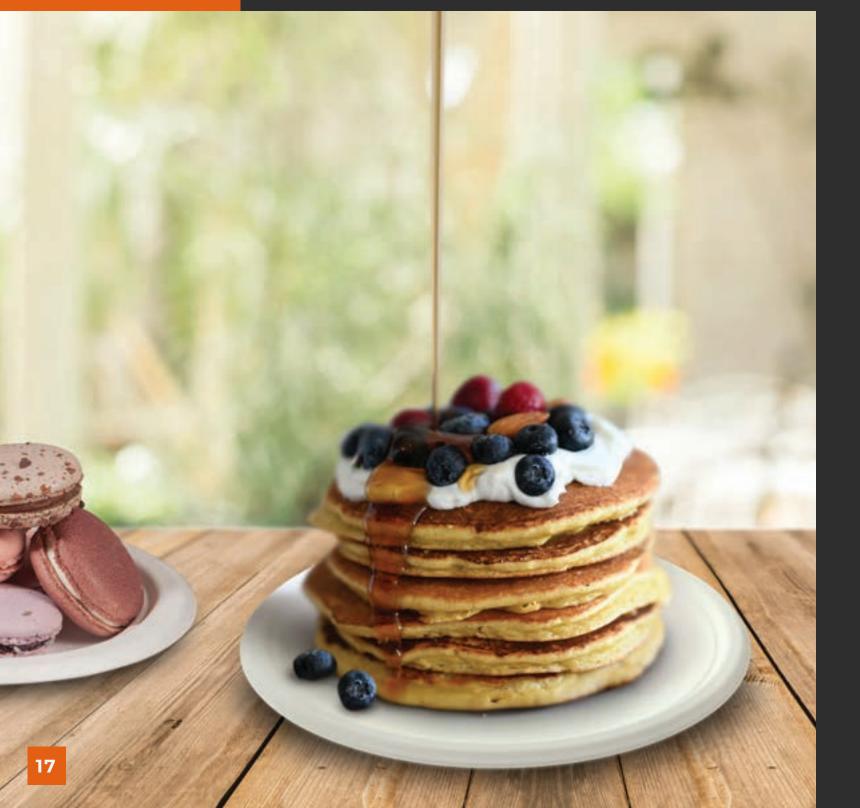

Bon Appetit!!!

Plates & Platters

Set the table with SustainablesTM single use plates in multiples sizes and pack counts. White and Natural colors available in a variety of sizes and shapes. This dinnerware holds up to pretty much anything!

- Grease and Cut-resistant
- 100% Chlorine Free

Doing Dishes

American's led fractured food lives, became a country of solo snackers and desktop diners. *Covid became a catalyst for families re-gathering around the dinner table*. A trend still going strong. Perhaps two-thirds of families are eating more home-cooked meals. Many are nostalgic in nature ... call them throwback comfort foods ... that make no effort to mimic what you'd get at the drive-thru or your corner bistro. Equally important, rising home delivery from restaurants and online stores exposes consumers to specialty ingredients typically used by restaurants ... and they're learning to use them in online cooking schools. Snacking is up, too ... a mechanism for coping with boredom ... but those snacks increasingly are fresh fruit and healthful packaged goods. These new eating trends will continue through the year ahead and beyond.

However NO ONE LIKES TO DO DISHES.

Well, with our Premium Single Use Dinnerware you don't have to do dishes anymore.

Everybody wants to save the Earth; nobody wants to help Mom do the dishes.

- P.J. O'Rourke American Journalist & Satirist

****UTLERY**

We make everything from renewable materials, including our cutlery. This makes it easy to go green or zero waste-just compost our cutlery right along with everything else! Made entirely from crystallized PLA, our cutlery won't crack and break in use and it stands up to heat but will break down when composted.

- Made from PLA plant based plastic-no petroleum products
- Stronger and sturdier than traditional products

- Compostable
- Available in black and white

Our Cutlery is madeout of CPLA, which is high - heat resistant and compostable.

米ustom Packaging

We Think:

We Kolor Outside the Lines:

We believe "Plate Matters". So we immerse ourselves in new projects, keeping an eye on the current packaging trends and also trendspotting what's on the horizon. We are always open to new ideas and concepts and recognize they can come from anyone, anywhere. We deep dive understanding our customer's needs, working hand-in-hand with them to develop creative and innovative designs that will delight our customers. We help create iconic packaging. Packaging that sets our customers apart. Chicken is Chicken, Black Beans and Rice are Black Beans and rice, our custom packaging will make it stand apart.

Our Superpower: Kreativity. We bring the most complex designs to life in an cost effective manner.

Our Best Kept Secret: We have an Award Winning Sister Company www.kanakscapes.com. A Premier Supplier to Steelcase Inc. from 2014-2022. A legacy of excellence. We can do your Cabinets, Tables and Furniture manufactured right here in Fort Wayne in one of our facilities.

Our Attitude: Nothing is impossible. If it is easy, it isn't worth it.

Robots are not coming, THEY'RE HERE

Accelerated use of Robots and other means of automation is one of the most provocative trends we are witnessing in the restaurant industry for 2022 and for years beyond. We have designed dinnerware with easy de-nesting and handling features which are being used by robots in food packaging.

How we think separates us from the rest of the animal kingdom. We can't fly, we are not particularly strong or fast, we cannot breathe underwater. As far as most physical functions are concerned the Human race is just average. It is the power of our thinking and our brain that separates us from the rest making Humans the dominant species on Earth.

Health is a state of complete physical, mental and social well-being, and not merely the absence of disease or infirmity.

- World Health Organization

World Health Organization

The path to a better, more responsible life starts from within.

At Kanak WE CARE. Not just about our own health and also the health of our planet. Life is about living in harmony with ourselves, with each other and also with our planet. It's not enough to think about our time on the earth in terms of our lives; we must also consider the health of our precious planet for future generations. This is the true meaning of environmental awareness. Rethinking even the smallest parts of our world can make a difference for our children's lives and those of our children's children.

We rethought, redesigned, and reimagined surgical products used every day in hospitals and clean rooms. We use sustainable materials for Surgical products that not only deliver clinical performance, but also eliminate plastic waste.

Surgery rooms demand the most stringent hygiene requirements, and why not? Every life matters and every second counts. We have the tightest quality control procedures in the industry that make our products safe to use in Hospitals and Surgery rooms.

The first wealth is health.

- Ralph Waldo Emerson

Kanak team members at the

米entucky Derby 2022, Churchill Downs.

We work hard, but we play harder.

Kanak Naturals
